About the Utilities Telecom Council

The Utilities Telecom Council (UTC) is a global, full-service trade association dedicated to creating a favorable business, regulatory, and technological environment for entities that own, manage, or provide critical telecommunications systems in support of core services. Founded in 1948, UTC has evolved into a dynamic organization that represents the broad communications interests of electric, gas, and water utilities; natural gas pipelines; other critical infrastructure entities and other industry stakeholders. Visit www.utc.org for more information on UTC and its services. UTC Research creates a variety of research products to provide the utility industry with the tools utilities need to make smart decisions. UTC Research also conducts consulting projects. These projects are done on a contract basis for the purpose of answering specific business questions associated with internal utility telecom operations and telecommunications businesses. For more information, contact Cynthia Brumfield, Director of Research, 202.833.6828 or Cynthia.Brumfield@utc.org or Kristy Weinschel, Director of Member Services, 202.833.6815 or Kristy.Weinschel@UTC.org.

UTC would like to acknowledge Verizon for funding this study. All views and conclusions expressed in the report are those of UTC, which is solely responsible for the content.

About Verizon Communications

Verizon Communications Inc. (NYSE, NASDAQ: VZ), headquartered in New York, is a global leader in delivering broadband and other wireless and wireline communications services to mass market, business, government and wholesale customers. Verizon Wireless operates America's most reliable wireless network, serving more than 92 million customers nationwide. Verizon also provides converged communications, information and entertainment services over America's most advanced fiber-optic network, and delivers innovative, seamless business solutions to customers around the world. A Dow 30 company, Verizon last year generated consolidated revenues of more than \$107 billion. For more information, visit www.verizon.com or contact:

Table of Contents

I. SUMMARY AND ANALYSIS.....	1
II. Introduction	4
III. History of Utility Telecommunications.....	4
IV. Current State of Utility Communications	5
V. Importance of Standards-Setting Processes	6
A. NIST Interoperability Roadmap.....	6
B. OpenSG Communications Working Group	7
VI. Key Technical Factors	9
A. Capacity or Bandwidth	11
B. Latency	12
C. Coverage	14
D. Reliability.....	15
E. Security	15
F. Uninterrupted Back-Up Power	17
VII. Opportunities for External Communications Providers	18
VIII. The Impact of State Regulation.....	19
IX. Importance of Federal Regulatory Initiatives	20
X. Conclusion.....	21
Appendix One – Survey of Utility Communication Needs	23
I. Introduction	24
II. Sample Characteristics	24
III. Field Force and Communications Employees	26
IV. Ownership of Communications Facilities	27
V. Wireless Field Force and Mobile Device Usage	27
VI. AMI Network Communications	32
VII. External Communications Providers	34
VIII. Security Concerns.....	36
IX. Design Criteria for Control Networks Regarding Latency.....	38

X. Design Criteria for Control Networks Regarding Reliability	40
XI. Design Criteria Regarding Power Back-Up.....	41
Appendix Two - Overview of Federal Regulatory Initiatives	46
I. Introduction	47
II. DOE RFI on Communications Needs of Utilities.....	47
III. FCC’s National Broadband Plan.....	47
IV. American Recovery and Reinvestment Act of 2009.....	49
V. State Legal/Regulatory Developments.....	49
VI. Access to Public Safety Spectrum	50
VII. Smart Grid Data Access/Privacy and Cyber security	51
Appendix Three – State Regulatory Considerations.....	53
I. The Basic Regulatory Approach	54
II. Concerns with the Traditional System	54
III. Current Financial Conditions Cloud the Outlook	55
IV. Alternatives to the Traditional Regulatory Process	56
V. The Opportunity of Smart Grid	57

Listing of Figures

Figure 1 - Smart Grid Conceptual Actors - Data Flow Diagram.....	8
Figure 2 – Respondents by Ownership	25
Figure 3 - Respondents by Geography.....	25
Figure 4 - Core Customers by Type of Service	26

Listing of Tables

Table 1 – Services Offered by Respondents.....	24
Table 2 – Communications Facilities Owned and Operated by Respondents	27
Table 3 - Mobile Devices Used in the Utility.....	27
Table 4 - Means of Providing Voice Dispatch Services.....	28
Table 5 - Land Mobile Radio Devices with Security Controlled by Utility.....	28
Table 6 - Cellular Security Controlled by Utilities	29
Table 7 - Policy on Disposing of Mobile Devices.....	29

Table 8 - How Devices are Disposed of or Recycled	29
Table 9 - Narrowbanding Solutions for Field Operations	30
Table 10 - Radios Carried by Field Force Personnel.....	30
Table 11 - Mobile Voice Network Communications to Field Automation Devices.....	31
Table 12 - Frequency of Cell Phone Replacement	31
Table 13 - Frequency of Private Radio Replacement.....	32
Table 14 – Deployment of Smart Meters with Two-Way Communications	32
Table 15 - Networks Used for Smart Meter Communications.....	32
Table 16 - Services Supported Over AMI	33
Table 17 - Solutions for Managing Smart Grid Data	33
Table 18 - Services Purchased from Outside Communications Providers	34
Table 19 - External Telecom Provider Use in Control Networks.....	34
Table 20 - External Telecom Provider Use in Operations and Network Management Systems	35
Table 21 - External Telecom Provider Use in AMI Networks	35
Table 22 - Factors for Tapping Outside Telecom Providers	35
Table 23 - Factors Against Using Outside Telecom Providers.....	36
Table 24 - Top Security Concerns.....	37
Table 25 - Concerns Over Ability to Apply Security Programs	38
